

HL-MP37 Short Rubber Milking Tube The Perfect Solution for Milking With 0.4-0.5MPa

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP37
- Minimum Order Quantity: 1 Bag
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000BAG /Month

Product Specification

- Features: Flexible, Durable, Non-toxic
- Inner Diameter: 8.7mm
- Name: Short Milk Tube
- Color: White Or Black
- Long: 15cm
- Material: Rubber/Silicone
- Working Pressure: Milking With 0.4-0.5MPa
- Usage: Connecting Short Milk Liner For Delivering Milk

Product Description:

The Milking Machine Tube is an essential component for dairy farms and milk processing facilities, designed to facilitate the smooth and efficient collection of milk from dairy animals. This high-quality Vacuum Tubing is a crucial part of the milking process, ensuring a reliable and hygienic transfer of milk from the animal to the storage tank.

With a working pressure of 0.4-0.5MPa, this Milk Machine Tube is capable of handling the rigors of daily milking operations with ease.

The durable rubber/silicone material used in the construction of this Liquid Collection Hose ensures long-lasting performance and resistance to wear and tear, even in demanding agricultural environments.

Measuring 15cm in length, this Milk Machine Tube provides ample reach and flexibility for convenient milk collection. The 8.7mm inner diameter of the tubing is optimally sized for efficient milk flow while maintaining a secure connection to the milking machine.

One of the standout features of this Vacuum Tubing is its compatibility with most milking machines available on the market. This universal fit ensures that dairy farmers and milk producers can easily integrate this Milk Machine Tube into their existing milking setup without the need for additional adapters or modifications.

Whether you are operating a small-scale dairy farm or a large milk processing facility, having a reliable and efficient milk collection system is crucial for maintaining the quality and productivity of your operation. The Milking Machine Tube offers a cost-effective solution for ensuring smooth milk transfer and collection, helping you streamline your milking process and maximize efficiency.

Investing in high-quality Vacuum Tubing like this Milk Machine Tube is a smart choice for any dairy operation looking to improve milk handling procedures and enhance overall productivity. With its durable construction, optimal dimensions, and universal compatibility, this Liquid Collection Hose is a versatile and dependable component that will serve you well for years to come.

Upgrade your milking system today with the Milking Machine Tube and experience the benefits of reliable and efficient milk collection.

Trust in the quality and performance of this essential piece of dairy equipment to help you achieve optimal results in your milk production endeavors.

Features:

Product Name: Milking Machine Tube

Features:

Flexible

Durable

Non-toxic

Inner Diameter: 8.7mm

Model: HL-MP37

Usage: Connecting Short Milk Liner For Delivering Milk

Length: 15cm

Technical Parameters:

Working Pressure	Milking With 0.4-0.5MPa
Long	15cm
Inner Diameter	8.7mm
Compatibility	Fits Most Milking Machines
Features	Flexible, Durable, Non-toxic
Name	Short Milk Tube
Usage	Connecting Short Milk Liner For Delivering Milk
Model	HL-MP37
Application	Milking Machine, Dairy Farm
Color	White Or Black

Applications:

The Milking Machine Tube, also known as the Liquid Collection Hose, is an essential component for dairy farmers using milking machines. This specific product, manufactured by Chuangpu under the model number HL-MP37, originates from China. With a working pressure optimized for milking at 0.4-0.5MPa, this tube is designed for efficient milk extraction on dairy farms.

The primary application of the Milking Machine Tube is within milking machines, where it serves as a key connector for delivering milk. Its compatibility with most milking machines makes it a versatile and practical choice for dairy farmers. The tube measures 15cm in length, providing the necessary reach for connecting short milk liners and facilitating the smooth flow of milk.

For dairy farm operations, the Milking Machine Tube plays a crucial role in ensuring the seamless extraction and collection of milk. Whether in small-scale or large-scale dairy setups, this dairy farm milking hose is a reliable and durable solution for maintaining efficient milking processes.
