### Product Description:

The Dairy Cleaning Supplies product offers essential tools for maintaining clean and sanitary conditions in dairy farms and milk parlors. One of the key items included in this set is the Milking Tube Brush, designed to effectively clean milking tubes and ensure proper hygiene during milking sessions. With a recommended daily usage frequency, this brush helps prevent the buildup of bacteria and contaminants, ultimately safeguarding the quality of the milk produced.

Another indispensable tool in the Dairy Cleaning Supplies collection is the Teat Dipping Cup. Made from durable plastic material, this cup is ideal for applying teat disinfectants to prevent infections and promote udder health in dairy cows. Its efficient design and 38mm/50mm clamp size make it easy to use and suitable for various types of teats, ensuring thorough and consistent application of the disinfectant solution.

In addition to individual cleaning tools, the Dairy Cleaning Supplies product also includes Milk Parlor Cleaning Solutions to address broader cleaning needs in the dairy environment. These solutions are specially formulated to break down organic residues, grease, and other contaminants commonly found in milking parlors, ensuring a clean and hygienic environment for both the cows and the milk processing equipment.

Each component in the Dairy Cleaning Supplies set is lightweight, with a weight of 0.2KG, making them easy to handle and transport around the farm or milking parlor. The use of plastic material for both the cleaning tools and solutions ensures durability and resistance to harsh cleaning chemicals, prolonging their lifespan and effectiveness in maintaining cleanliness.

When it comes to the washing head of the cleaning tools, such as the Milking Tube Brush and Teat Dipping Cup, the plastic construction offers a balance of flexibility and sturdiness. This allows for thorough cleaning and disinfection of surfaces without causing damage or scratches, ensuring the longevity of both the tools and the equipment they are used on.

Overall, the Dairy Cleaning Supplies product provides dairy farmers and milk parlor operators with essential tools and solutions to maintain high standards of cleanliness and hygiene in their operations. From daily cleaning tasks to more thorough sanitation processes, each component in this set is designed to contribute to the overall health and productivity of the dairy herd and the quality of the milk produced.

### Features:

Product Name: Dairy Cleaning Supplies

Washing Head: Plastic

Model: HL-MP04

Recommended Usage Frequency: Daily

Feature: Unique Design, Convenient To Place Milk Cup Group

Item Name: Milking Washing Plate (Jetter Tray )

### Technical Parameters:

Parameter	Value
Installing	Be Fixed On Washing Pipe In Milking Parlor
Clamp Size	38mm/50mm
Product Type	Cleaning Supplies
Applicability	Washing Milk Cluster Group In Delaval Milking Parlor
Feature	Unique Design, Convenient To Place Milk Cup Group
Model	HL-MP04
Washing Mat	Rubber
Recommended Usage Frequency	Daily
Item Name	Milking Washing Plate (Jetter Tray )
Washing Head	Plastic

## Applications:

Chuangpu Dairy Cleaning Supplies, model number.HL-MP04, are a must-have product for dairy farmers looking to maintain hygiene and cleanliness in their milking parlors. These cleaning supplies, originating from China, are specifically designed for washing milk cluster groups in Delaval milking parlors.

The unique design of the Milking Washing Plate (Jetter Tray) makes it convenient to place the milk cup group for efficient cleaning. With a weight of only 0.2KG, the cleaning supplies are lightweight and easy to handle during the cleaning process.

These Dairy Cleaning Supplies are installed by being fixed on the washing pipe in the milking parlor, ensuring a secure and stable cleaning setup. The Chuangpu brand is known for its quality and reliability, making these cleaning supplies a trusted choice for dairy farmers.

Whether you need to use Udder Care Disinfectants, Dairy Facility Cleaning Supplies, or a Milk Liner Brush, these cleaning supplies are versatile and compatible with various cleaning agents and tools. The applicability of these supplies in washing milk cluster groups highlights their importance in maintaining a clean and healthy milking environment.
