Product Description:

The Teat Dip Cup is an essential tool for maintaining the hygiene and health of dairy cattle. Model HL-MP57, this teat dipping cup is designed to provide efficient and thorough cleaning of teats to prevent infections and ensure the quality of milk production. With its distinctive green and blue cover, this teat dip cup is easily identifiable and stands out among farm dairy disinfectant equipment. For dairy farmers in Shanghai and beyond, the Teat Dip Cup is a reliable and effective solution for milking equipment cleaning. It helps in the proper application of teat disinfectants, ensuring that dairy cattle are protected from harmful bacteria and pathogens. By incorporating this teat dipping cup into regular cleaning routines, farmers can maintain a high standard of cleanliness in their dairy operations.

When it comes to the health and well-being of dairy cattle, using the right cleaning supplies is crucial. The Teat Dip Cup is specially designed for dairy cows, making it easy to reach and clean teats effectively. Its durable construction and user-friendly design make it a practical choice for daily use on the farm.

Proper hygiene practices are essential in dairy farming to prevent the spread of diseases and maintain the quality of milk. The Teat Dip Cup plays a key role in this process by ensuring that teats are thoroughly cleaned and disinfected before and after milking. By using this teat dipping cup, farmers can protect their cattle from infections and promote overall herd health.

As one of the leading milking equipment cleaning products on the market, the Teat Dip Cup offers a reliable and convenient solution for dairy farmers. Its efficient design allows for quick and easy application of disinfectants, saving time and effort during the cleaning process.

With its vibrant green and blue cover, this teat dip cup is not only functional but also visually appealing.

Whether you are a small-scale dairy farmer or a large commercial operation, the Teat Dip Cup is a must-have tool for maintaining cleanliness and hygiene in your dairy facility. By investing in quality cleaning supplies like this teat dipping cup, you can ensure the health and safety of your dairy cattle while also enhancing the quality of your milk production.

Make the Teat Dip Cup a part of your daily milking routine and experience the difference it can make in the cleanliness and hygiene of your dairy operation. With its durable construction, easy-to-use design, and effective cleaning capabilities, this teat dipping cup is the ideal choice for dairy farmers who prioritize the well-being of their cattle and the quality of their milk.

Choose the Teat Dip Cup for superior cleaning performance, reliable disinfection, and overall peace of mind in your dairy farming practices. Trust in this farm dairy disinfectant tool to help you maintain a clean and healthy environment for your dairy cattle, ensuring optimal milk quality and the well-being of your herd.

Applications:

Chuangpu Dairy Facility Cleaning Supplies are essential for maintaining cleanliness and hygiene in dairy farms and milk houses. One of the key products in this range is the Teat Dip Cup, model number HL-MP57, designed to effectively sanitize cow's teats before and after milking.

Originating from China, specifically Jiangsu province, these dairy cleaning supplies are known for their quality and efficiency in removing dirt, bacteria, and other contaminants from milking equipment and facilities. The Teat Dip Cup from Chuangpu comes in a vibrant green and blue cover color, making it easily visible and accessible in farm settings.

Whether you are a small-scale dairy farmer or a large commercial milk producer, Chuangpu Dairy Cleaning Supplies are suitable for all types of dairy facilities. The return type design of the Teat Dip Cup ensures proper and controlled application of sanitizers, promoting better udder health and milk quality.

With a packing of 50 pieces measuring 38/38/47cm and weighing 5.8kg, these dairy cleaning supplies are convenient to store and transport around the farm. The Teat Dip Cup is ideal for various scenarios such as pre-milking teat preparation, post-milking sanitization, and general farm hygiene maintenance.

Farmers can rely on Chuangpu Dairy Facility Cleaning Supplies to meet their daily sanitation needs, ensuring a clean and healthy environment for dairy cows and high-quality milk production. Invest in these Teat Dip Cups and other farm milk house sanitizers to streamline your cleaning processes and safeguard your dairy operation.

Return teat dip cup

The green type is a non-refluxable teat dip cup. Using this bottle to carry out a medicated bath for the cows can effectively avoid cross-infection between the cows due to the medicated bath.

The importance of medicated bath

One aspect of good dairy management is to make the body cell content of milk 200,000 / ml. Studies have shown that there is already invisible mastitis in the breast. Therefore, the milk production potential cannot be exerted, and the quality of milk is also affected. In practice, there are many ways to keep the bovine somatic cells below 200,000. It is a very effective method to use the medicated bath after each milking.
