

## Highly Effective Milk Machine Parts Silicone Inflation Plugs For Improved Milking Efficiency

Our Product Introduction

more products please visit us on [mobilemilkingmachine.com](http://mobilemilkingmachine.com)

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP79
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

### Product Specification

- Name: Milking Stopper
- Condition: New
- Material: Silicone
- Outer Diameter: 3.3cm
- Color: Green And White
- Length: 5.8cm
- Usage: When A Cow's Nipples Have Mastitis, It Is Unable To Complete Milking. In This Case, A Milking Plug Is Used To Assist In Milking.
- Use: Milking Machine Accessories
- Highlight: **Milk Machine Silicone Inflation Plugs, Improved Efficiency Milk Machine Parts, Highly Effective Milk Machine Parts**

### Product Description:

The Milking Stopper is an essential milking machine part designed to assist in milking when a cow's nipples have mastitis, preventing the completion of the milking process. This silicone milking plug is a crucial accessory for milking machines, particularly in cases where the cow is unable to complete milking due to mastitis.

Made from high-quality silicone material, the Milking Stopper is durable and reliable, ensuring efficient and effective operation during milking. Its new condition guarantees optimal performance, providing a seamless milking experience for both the cow and the operator. As a vital component of milking machine accessories, the Milking Stopper plays a crucial role in facilitating the milking process and maintaining the overall functionality of the milking system.

When it comes to milking machine components, the Milking Stopper stands out as a key accessory that can significantly aid in milking operations, especially in cases where mastitis poses a challenge. By using the Milking Stopper, operators can ensure that milking is completed successfully, even when faced with difficulties such as mastitis in cows.

For dairy farmers and milk producers, having the Milking Stopper as part of their milking machine accessories is essential for overcoming milking challenges and ensuring the smooth operation of their milking systems. Whether used as a standalone accessory or in conjunction with other milking machine parts, the Milking Stopper offers a practical solution for addressing milking issues caused by mastitis or other conditions affecting the cow's nipples.

In addition to regular maintenance and checks on milking machine components, having the Milking Stopper on hand can be a valuable asset for dairy farmers looking to optimize their milking operations. By including the Milking Stopper in their arsenal of milking machine accessories, operators can be better prepared to handle unexpected situations during milking and ensure the well-being of their dairy cows.

When it comes to pulsator maintenance kit and milk pulsator repair kits, the Milking Stopper complements these essential tools by providing an additional solution for addressing specific milking challenges related to mastitis in cows. By incorporating the Milking Stopper into their milking routines, operators can enhance the efficiency and effectiveness of their milking processes, ultimately leading to improved milk production outcomes and overall operational success.

Overall, the Milking Stopper serves as a valuable milking machine part that offers practical assistance in milking situations where cows are unable to complete the milking process due to mastitis. With its silicone construction, new condition, and compatibility with various milking systems, the Milking Stopper is a reliable and effective accessory for dairy farmers and milk producers seeking to optimize their milking operations and ensure the well-being of their dairy cows.

### Features:

Product Name: Milking Machine Parts

Name: Milking Stopper

Use: Milking Machine Accessories

Color: Green And White

Outer Diameter: 3.3cm

Usage: When A Cow's Nipples Have Mastitis, It Is Unable To Complete Milking. In This Case, A Milking Plug Is Used To Assist In Milking.

### Technical Parameters:

Parameter	Value
Length	5.8cm
Color	Green And White
Use	Milking Machine Accessories
Inner Diameter	2.6cm
Material	Silicone
Usage	When A Cow's Nipples Have Mastitis, It Is Unable To Complete Milking. In This Case, A Milking Plug Is Used To Assist In Milking.
Name	Milking Stopper

Outer Diameter	3.3cm
Condition	New
Width	5.9cm

**Applications:**

Chuangpu's HL-MP79 Milking Stopper is a vital component in cow milking setups, especially in scenarios where a cow's nipples are affected by Mastitis. When a cow is unable to complete milking due to this condition, the Milking Stopper comes to the rescue, assisting in the milking process effectively.

Originating from China, this milking plug is designed to be versatile and durable, catering to the needs of dairy farmers worldwide. Its green and white color scheme adds a touch of vibrancy to the milking environment, making it easy to spot among other udder milking parts.

The inner diameter of 2.6cm ensures a snug fit for most milking machines, offering a secure and efficient milking experience. Crafted from high-quality silicone, the Milking Stopper by Chuangpu guarantees longevity and reliability, even in demanding milking conditions.

Whether used as a replacement part in milk pulsator repair kits or as a standalone cow milking attachment, the HL-MP79 Milking Stopper proves to be essential in maintaining smooth milking operations. Its functionality and compatibility make it a go-to choice for dairy farmers looking to optimize their milking processes.
