

MilKing Machine Parts Rubber Shell Liner Block With Black Color For Performance And Design

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP79
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

Product Specification

- Color: Black
- Material: Rubber
- Name: Milking Stopper
- Outer Diameter: 3.3cm
- Width: 5.9cm
- Condition: New
- Length: 5.8cm
- Use: Milking Machine Accessories
- Highlight: Rubber Milking Machine Liners, Black Color MilKing Machine Parts, Milking Machine Liners Block

Product Description:

The Milking Machine Parts product includes essential components designed to improve the efficiency of milking processes. One key component is the milking pulsator membrane, which plays a crucial role in regulating the pulsation rate of the milking machine. With an inner diameter of 2.8cm and an outer diameter of 3.3cm, this pulsator diaphragm is compatible with various milking machines, ensuring versatile application across different setups.

When a cow's nipples are affected by mastitis, the milking process can become challenging as the cow may be unable to complete milking on its own. In such cases, utilizing a milking plug becomes necessary to assist in the milking process. The milking plug, which has a length of 5.8cm and comes in a sleek black color, serves as a supportive tool to ensure that milking can be completed effectively despite the mastitis condition.

By incorporating the milking pulsator membrane and milking plug into the milking machine setup, dairy farmers can enhance the overall milking experience for both the cows and the operators. These milking machine components contribute to smoother milking operations and help maintain the well-being of the cows, ensuring that the milking process remains efficient and comfortable.

Features:

Product Name: Milking Machine Parts
Use: Milking Machine Accessories
Length: 5.8cm
Color: Black
Inner Diameter: 2.8cm
Material: Rubber

Technical Parameters:

Condition	New
Width	5.9cm
Use	Milking Machine Accessories
Usage	When A Cow's Nipples Have Mastitis, It Is Unable To Complete Milking. In This Case, A Milking Plug Is Used To Assist In Milking.
Color	Black
Outer Diameter	3.3cm
Inner Diameter	2.8cm
Material	Rubber
Length	5.8cm
Name	Milking Stopper

Applications:

The Milking Machine Parts from Chuangpu, model HL-MP79, originating from China, are versatile components designed for specific product application occasions and scenarios. With a length of 5.8cm, these parts are essential for addressing milking challenges, particularly when dealing with cows suffering from mastitis in their nipples.

One of the key usage scenarios for the Milking Machine Parts is when a cow's nipples are affected by mastitis, hindering the milking process. In such instances, the Milking Stopper with an outer diameter of 3.3cm and a width of 5.9cm comes into play. By using this specific part, farmers can assist in completing the milking process efficiently and effectively, ensuring the well-being of their livestock. These Milking Machine Parts are not only crucial for addressing mastitis-related issues but also serve as integral components for

maintaining and optimizing the overall performance of milking machines. Farmers can utilize these parts in conjunction with other milking machine components such as pulsator maintenance kits to ensure smooth operations and consistent milk production. Whether it's replacing worn-out parts, upgrading existing milking equipment, or conducting routine maintenance, the Milking Machine Parts from Chuangpu offer reliability and durability for various product application occasions. Farmers can trust these high-quality components to deliver consistent performance and support their milking operations effectively.
