

Goating Milking Machine Parts Milk Cluster Assembly With Silicone Liner And Direct Connection

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-M09C
- Minimum Order Quantity: One Set
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 500SETS/Month

Product Specification

- Application: Dairy Farm
- Cluster Collector: No Collector, With Y Connector For Connecting Tube Directly
- Weight: 0.6Kg
- Cluster Valve: Automatic Claw, New Zealand Model
- Suitable For: Goating Milking Machine Parts
- Payment Term: T/T, Paypal, Western Union
- Cluster Connection: Milking Machine System
- Consists Of: Milk Shell, Milk Liner, Milk Valve, Silicone Pulse Tube, Silicone Milk Tube And Y Connector
- Highlight: **Goating Milking Machine Parts, Silicone Liner Milk Cluster Assembly**

Product Description:

The Milking Cluster Group is an essential component of a Cow Milking Assembly, designed to be integrated into a Bovine Milking Mechanism. This product is specifically created for Dairy Farm Milking Parts, making it a crucial element in the milking process on a dairy farm.

With a weight of 0.6Kg, the Milking Cluster Group is lightweight yet durable, ensuring efficient and reliable performance during milking operations. Its Cluster Connection is compatible with the Milking Machine System, seamlessly integrating into existing milking setups on dairy farms.

The Milking Cluster Group is primarily used in the application of Dairy Farm milking, where it plays a pivotal role in extracting milk from dairy cows. It facilitates the milk flow from the cow's udder to the collection point, streamlining the milking process for dairy farmers.

One of the key features of the Milking Cluster Group is its Cluster Collector design. Unlike traditional collectors, this product is equipped with a Y Connector for connecting tubes directly, eliminating the need for a separate collector. This innovative design enhances efficiency and simplifies the milking setup, saving time and resources for dairy farmers.

Overall, the Milking Cluster Group is a reliable and efficient component for dairy farm milking operations. Its compatibility with the Milking Machine System, lightweight construction, and innovative Cluster Collector design make it a valuable asset for dairy farmers looking to optimize their milking processes.

Features:

Product Name: Milking Cluster Group

Application: Dairy Farm

Name: Goat Milking Cluster Group

Suitable For: Goating Milking Machine Parts

Cluster Collector: No Collector, With Y Connector For Connecting Tube Directly

Weight: 0.6Kg

Technical Parameters:

Used For	Dairy Farm Milking Parts
Payment Term	T/T , Paypal , Western Union
Suitable For	Goating Milking Machine Parts
Weight	0.6Kg
Cluster Connection	Milking Machine System
Consists of	Milk Shell, Milk Liner, Milk Valve, Silicone Pulse Tube, Silicone Milk Tube And Y Connector
Animal	Goat And Sheep
Cluster Valve	Automatic Claw, New Zealand Model
Cluster Liner	Silicone
Cluster Collector	No Collector, With Y Connector For Connecting Tube Directly

Applications:

Chuangpu's HL-M09C Goat Milking Cluster Group is a versatile and essential dairy farm milking solution designed to optimize milk production efficiency. This milking cluster group, originating from China, is a reliable and high-quality product that meets the needs of modern dairy farms.

The Milking Cluster Group is specifically designed for use in dairy farm settings, making it an ideal milk extraction equipment for dairy farmers looking to streamline their milking processes. Consisting of essential components such as Milk Shell, Milk Liner, Milk Valve, Silicone Pulse Tube, Silicone Milk Tube, and Y Connector, this product ensures a smooth and effective milking operation.

Whether you are milking a small herd or a large commercial operation, the Chuangpu HL-M09C Goat Milking Cluster Group is a perfect fit. Its cluster connection to a milking machine system ensures seamless integration and reliable performance, making it a valuable asset

in any dairy farm setting.

With flexible payment terms including T/T, Paypal, and Western Union, acquiring this milking cluster group is convenient and hassle-free. Dairy farmers can trust in the brand reputation of Chuangpu and the quality assurance that comes with the HL-M09C model.

Investing in this milking cluster group not only improves milk production efficiency but also enhances overall milking operation effectiveness. Dairy farmers can rely on this product to deliver consistent and reliable performance, making it a must-have milk extraction equipment for any dairy farm looking to optimize its milking processes.
