

Bracket Installation Method for Glass Milk Measuring Bottle in Milking Parlor Top Dia. 198mm

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-G06
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 7-10 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000PCS /Month

Product Specification

- Application: For Collecting Milk And Measuring In Milking Parlor
- Top Dia.: 198mm
- Installation Method: Using Bracket To Support And Fix In Milking Parlor
- Logo On Body: Acceptable
- Model: HL-G06
- Volume: 50L (without Scale)
- Port: Ningbo Or Shanghai
- User Target: Cow

Product Description:

The Glass Bottle for Milk Measuring is an essential tool for dairy farmers looking to efficiently collect and measure milk in their milking parlors. This innovative product, also known as the Glass Milk Meter or Glass Milk Jar, is designed with the specific needs of cow users in mind.

The Milk Meter comes in Single Packaging, ensuring that each unit is securely protected during transportation and storage. With a Foam Interlayer, the product is further safeguarded against any potential damage that may occur during handling or shipping.

Constructed from High Borosilicate material, the Milk Meter is durable and reliable for long-term use in farm settings. This high-quality material ensures that the product maintains its integrity even when exposed to the rigors of daily milk collection and measurement.

Designed specifically for cows, the Glass Bottle for Milk Measuring serves as a Farm Production Sensor, allowing dairy farmers to accurately monitor and record milk production levels. By using this product, farmers can streamline their milking process and gather valuable data for optimizing their dairy operations.

In addition to measuring milk output, the Glass Milk Meter can also function as a Lactation Recorder, enabling farmers to track the lactation cycles of their cows. This information is crucial for monitoring the health and productivity of individual cows, as well as for making informed breeding and management decisions.

Whether used for routine milk collection or in-depth milk production analysis, the Glass Bottle for Milk Measuring offers a versatile and efficient solution for dairy farmers. Its user-friendly design and accurate measurement capabilities make it a valuable asset in any milking parlor setting.

Features:

Product Name: Milk Meter

Application: For Collecting Milk And Measuring In Milking Parlor

Volume: 50L (without Scale)

Top Dia.: 198mm

User Target: Cow

Logo on Body: Acceptable

Technical Parameters:

Thickness	4-6mm
Weight	12 Kg (reference)
Model	HL-G06
Another Name	Glass Milk Meter (Glass Milk Jar)
Application	For Collecting Milk And Measuring In Milking Parlor
Packing	Single Packaging, Foam Interlayer
Logo on Body	Acceptable
User Target	Cow
Body Hole Dia.	60mm
Material	High Borosilicate

Applications:

One key application of the HL-G06 Milk Meter is in dairy farms for monitoring and managing cattle productivity. By using this Milk Measuring Bottle, farmers can precisely measure the milk output of each cow, allowing for efficient tracking of individual animal performance.

Another important use of the Chuangpu HL-G06 Milk Meter is during milking sessions. Its high-quality construction with High Borosilicate material ensures durability and accuracy in milk measurement. The 4-6mm thickness of the meter body and a Body Hole Dia. of 60mm contribute to its sturdy build, making it suitable for daily use in demanding farm environments.

Moreover, the HL-G06 Milk Meter's design, featuring a Top Dia. of 198mm, enhances ease of use and readability during milk measuring processes. Its user-friendly interface makes it convenient for farmers to obtain accurate milk volume readings quickly and efficiently. With its origins in China, the Chuangpu HL-G06 Milk Meter embodies quality craftsmanship and reliability. Whether in large-scale dairy operations or small livestock farms, this product proves to be an indispensable tool for precise milk measurement and management.
