Product Description

Product Description:

The Insemination Gun Protector is a vital tool for artificial insemination procedures, commonly used in animal breeding and reproduction processes. This Fertilization Syringe Device is specifically designed to assist in the precise delivery of semen during the insemination process. Crafted from high-quality PE material, this instrument ensures durability and reliability during use.

With a length of 450mm, the Insemination Gun Protector provides a comfortable grip for users, allowing for easy handling and accurate placement. Each package contains 20 pieces, and there are 100 packages in a carton, making it convenient for bulk orders and storage. It is important to note that the Insemination Gun Protector is a disposable product, meant for single-use only. To maintain hygiene standards and prevent cross-contamination, it is recommended to destroy the instrument after each use.

The primary usage of the Insemination Gun Protector is in artificial insemination procedures, where it plays a crucial role in the successful fertilization of animals. When used in conjunction with the Insemination Gun Protector, this Fertility Injection Instrument ensures precise delivery of semen into the reproductive tract, increasing the chances of conception.

Features:

Product Name: Insemination Gun

Usage: Artificial Insemination, Used With Insemination Gun

Note: Disposable Product, Please Destroy It After Use

Country Of Origin: China

Length: 450mm

Name: Insemination Gun Protector

Technical Parameters:

Length	450mm
Outer Diameter	4.5mm
Material	PE
Note	Disposable Product, Please Destroy It After Use.
One Carton Weight	5.2kg
Color	Transparent
Usage	Artificial Insemination, Used With Insemination Gun
Country Of Origin	China
Package Quantity	20pcs/bag, 100bag/CTN
Name	Insemination Gun Protector

Applications:

The Insemination Gun Protector by Chuangpu (Model: HL-SJ-WT) is a versatile and essential tool for various product application occasions and scenarios. Designed in China, this artificial insemination device is a reliable and efficient choice for procreative injection procedures. With a weight of 5.2kg per carton, the Insemination Gun is lightweight and easy to handle.

Whether used in veterinary practices, animal husbandry facilities, or breeding centers, this Fertilization Syringe Device is a crucial instrument for successful artificial insemination processes. The transparent color of the gun allows for clear visibility of the contents, ensuring accurate and precise injections.

Made from durable and hygienic PE material, the Insemination Gun Protector is a disposable product that should be properly destroyed after each use to maintain cleanliness and prevent contamination. Each carton contains 20 pieces of the Insemination Gun Protector, with a total of 100 bags per CTN, providing a convenient and ample supply for multiple procedures.

From inseminating livestock to assisting with breeding programs, the Insemination Gun Protector offers a reliable and user-friendly solution for various animal reproductive needs. Its ergonomic design and easy-to-use mechanism make it suitable for both experienced professionals and beginners in the field.

Whether you are a veterinarian, a breeder, or a farmer looking to improve your reproductive practices, the Insemination Gun Protector by Chuangpu is a valuable tool that ensures efficient and successful artificial insemination processes. Trust in this high-quality Procreative Injection Prop to help you achieve your breeding goals effectively and safely.

PRODUCT INTRODUCTION

WE ALWAYS ADHERE TO RIGOROUS MANAGEMENT, THE FOUNDATION OF METICULOUS MANUFACTURING,
PRODUCE PRODUCTS THAT MEET THE MARKET'S RULES AND CUSTOMER NEEDS.

Name: Cattle Inseminating Syring Cannula

Model: HL-SJ-WT

Specification: Length 450mm, outer diameter 4.5mm

Packing: 20 PCS/bag, 100 bags/case

Material: PE

Application: cattle artificial insemination inseminating
syring protective sleeve

Note: This product is disposable. Please destroy after use

THE TOP FOUR MAIN REASONS FOR CHOOSING US

WE ALWAYS ADHERE TO RIGOROUS MANAGEMENT, THE FOUNDATION OF METICULOUS MANUFACTURING,
PRODUCE PRODUCTS THAT MEET THE MARKET'S RULES AND CUSTOMER NEEDS

01

Individually packaged

Independent packaging, double hygiene protection effects when the insemination

02

The inner plug sticks together

The inner plug is fixed at the front of the cannula and it is integrated into one to prevent falling off

03

The front end of the cannula is smooth

The front end of the cannula is smooth design with small opening and less semen residue

04

Extensive adaptation

It can be used to protect all kinds of inseminating syringe on the market
