

## 150cc PC Milk Claw with Plastic Base 0.43kg with Air Outlet Dia 9.5mm

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-M01
- Minimum Order Quantity: 1 Pcs
- Packaging Details: Carton
- Delivery Time: 7-10 woks day
- Payment Terms: T/T, Western Union
- Supply Ability: 5000 Pcs/Month

### Product Specification

- Liner Outlet Dia: 13mm
- Compatibility: Fits Most Milking Machines
- Weight: 0.43kg
- Air Outlet Dia: 9.5mm
- Model: HL-M01
- Claw Cap: PC
- Capacity: 150CC
- Milk Outlet Dia: 19mm
- Highlight: **0.43kg Milk Claw, 150cc Milk Claw, Plastic Base Milk Claw**

## Product Description

### Product Description:

The Milking Machine Claw is an essential component designed for efficient milk extraction in dairy farming. This high-quality claw is specifically engineered to meet the needs of dairy farmers seeking a reliable and effective suction claw for cattle.

With a Milk Outlet Diameter of 19mm, this milking claw ensures a smooth and steady flow of milk from the cow's udder to the milking machine. The optimal size of the milk outlet diameter allows for efficient milk extraction, reducing the time and effort required for the milking process.

The Claw Cap of this milking machine claw is made of durable polycarbonate (PC) material, known for its strength and longevity. The PC Claw Cap ensures the durability and longevity of the milking claw, making it a reliable and cost-effective option for dairy farmers.

Weighing only 0.43kg, this milking claw is lightweight and easy to handle, making it convenient for daily use in the dairy farm. The lightweight design of the milking claw reduces strain on the milking cluster and the operator, enhancing efficiency and comfort during the milking process.

The model HL-M01 Milking Machine Claw is designed to meet the highest standards of quality and performance in dairy farming. Its precision engineering and durable construction make it a dependable and efficient choice for dairy farmers looking for a reliable suction claw for cattle.

With a Liner Outlet Diameter of 13mm, this milking claw ensures a secure and efficient connection to the milking machine's liners. The optimal size of the liner outlet diameter enables smooth milk flow and a tight seal, preventing leaks and ensuring maximum milk extraction efficiency.

Overall, the Milking Machine Claw is a top-of-the-line product that offers dairy farmers a reliable and efficient solution for milk extraction. Its durable construction, lightweight design, and precision engineering make it an ideal choice for those seeking a high-quality suction claw for cattle. Invest in the HL-M01 Milking Machine Claw today and experience the convenience and efficiency it brings to your dairy farm.

### Features:

Product Name: Milking Machine Claw

Air Outlet Dia: 9.5mm

Liner Outlet Dia: 13mm

Milk Outlet Dia: 19mm

Capacity: 150CC

Claw Cap: PC

### Technical Parameters:

Liner Outlet Dia	13mm
Milk Outlet Dia	19mm
Weight	0.43kg
Model	HL-M01
Claw Cap	PC
Compatibility	Fits Most Milking Machines
Air Outlet Dia	9.5mm
Capacity	150CC

### Applications:

The Chuangpu HL-M01 Milking Machine Claw is a versatile and efficient tool designed for use in various milking scenarios. With its durable PC claw cap and compatibility with most milking machines, this claw assembly is a reliable choice for dairy farmers.

One of the primary product application occasions for the HL-M01 Milking Machine Claw is in commercial dairy farms. The claw's 150CC capacity and udder suction design make it ideal for use in milking clusters, ensuring efficient and thorough milking of cows in large-scale operations. Its lightweight design, weighing only 0.43kg, allows for easy handling and maneuverability during milking sessions.

In addition to commercial dairy farms, the Chuangpu HL-M01 Milking Machine Claw is also suitable for smaller-scale dairy operations and hobby farms. Its compatibility with most milking machines makes it a versatile choice for farmers looking to upgrade or replace their existing milking claws.

Furthermore, this milking claw assembly is well-suited for use in mobile milking setups, such as at agricultural exhibitions or temporary milking stations. The durable PC claw cap ensures long-lasting performance, even in demanding milking environments.

Whether used in a traditional milking parlor or a modern automated milking system, the Chuangpu HL-M01 Milking Machine Claw delivers consistent and reliable milking performance. Its efficient udder suction design helps optimize milk extraction while maintaining cow comfort and welfare.
