

400cc PSU 0.5kg Milk Claw With Stainless Steel Base

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-M04A-1
- Minimum Order Quantity: 1 Pcs
- Packaging Details: Carton
- Delivery Time: 7-10 woks day
- Payment Terms: T/T, Western Union
- Supply Ability: 5000 Pcs/Month

Product Specification

- Claw Base: SS
- Model: HL-M04A-1
- Air Outlet Dia: 10mm
- Milk Outlet Dia: 20mm
- Weight: 0.5kg
- Claw Cap: PPSU
- Compatibility: Fits Most Milking Machines
- Liner Outlet Dia: 14mm
- Highlight: **Milk Claw with Stainless Steel Base,
0.5kg Milk Claw, 400cc Milk Claw**

Product Description

Product Description:

The Claw Base of this milking cluster is constructed from high-quality stainless steel, providing durability and hygiene for long-term use. Stainless steel not only offers excellent resistance to corrosion but also ensures easy cleaning and maintenance, crucial for dairy equipment used in milking operations.

One of the standout features of this milk suction claw is its compatibility, as it fits most milking machines available on the market. This versatility makes it a practical choice for dairy farmers looking to upgrade or replace their existing milking clusters without the hassle of compatibility issues.

Whether you are a small-scale dairy farmer or managing a large commercial dairy operation, the Milking Machine Claw HL-M04A-1 offers reliability and efficiency in milk extraction. Its robust construction and user-friendly design make it a valuable asset in any milking setup, ensuring consistent milk extraction with minimal effort.

Investing in a high-quality milking claw assembly is essential for maximizing milk production and maintaining the health of your dairy herd. The HL-M04A-1 milking cluster provides the precision and performance needed to streamline the milking process, resulting in higher yields and improved efficiency on the farm.

With its 14mm Liner Outlet Dia, the milk suction claw ensures a steady milk flow, reducing the chances of blockages and ensuring thorough milking of each cow. The 400CC capacity of the claw allows for efficient milk collection, catering to the needs of different herd sizes and milking routines.

Constructed from durable stainless steel, the Claw Base of this milking cluster offers strength and reliability, withstanding the rigors of daily milking operations. The stainless steel material is easy to clean and sanitize, meeting the strict hygiene standards required in dairy farming.

Whether you are using a traditional milking machine or a more advanced milking system, the HL-M04A-1 milking claw assembly is designed to seamlessly integrate with most milking machines on the market. Its universal compatibility ensures a hassle-free setup and operation, allowing you to focus on efficient milk extraction without worrying about equipment compatibility.

Upgrade your milking setup with the Milking Machine Claw HL-M04A-1 and experience the benefits of a reliable and high-performance milking cluster. Designed to meet the demands of modern dairy farming, this milk suction claw offers precision, durability, and compatibility, making it an essential tool for maximizing milk production and ensuring the well-being of your dairy herd.

Features:

Product Name: Milking Machine Claw

Liner Outlet Dia: 14mm

Compatibility: Fits Most Milking Machines

Capacity: 400CC

Model: HL-M04A-1

Air Outlet Dia: 10mm

Technical Parameters:

Liner Outlet Dia	14mm
Claw Base	SS
Claw Cap	PPSU
Model	HL-M04A-1
Capacity	400CC
Weight	0.5kg
Milk Outlet Dia	20mm
Compatibility	Fits Most Milking Machines
Air Outlet Dia	10mm

Applications:

The Chuangpu HL-M04A-1 milking machine claw is a versatile and efficient tool designed for milk harvesting in dairy farms. With a capacity of 400CC, this claw is suitable for extracting milk from cows, goats, and other dairy animals.

The udder suction claw is a crucial component in milking machines, and the Chuangpu HL-M04A-1 is a reliable choice for farmers seeking high-quality equipment. Its SS claw base ensures durability and hygiene during milking operations, while the 14mm liner outlet diameter allows for smooth milk flow.

This milking machine claw is compatible with most milking machines, making it a convenient choice for dairy farmers with different equipment setups. Whether you have a portable milking machine or a stationary one, the Chuangpu HL-M04A-1 claw cap made of PPSU provides a secure and airtight seal for efficient milk extraction.

Whether you are running a small-scale dairy farm or a large commercial operation, the Chuangpu HL-M04A-1 milking machine claw is suitable for various milking scenarios. Its reliable performance and durable construction make it ideal for daily milking routines, ensuring consistent milk extraction with minimal effort.

From routine milking sessions to special occasions such as breeding or health check-ups, the Chuangpu HL-M04A-1 milking machine claw is a versatile tool that can handle different milking scenarios with ease. Its efficient design and compatibility with different milking

machines make it a valuable addition to any dairy farm looking to streamline their milk harvesting process. Whether you are a seasoned dairy farmer or new to milking operations, the Chuangpu HL-M04A-1 milking machine claw offers a reliable and efficient solution for udder suction and milk extraction. Made in China with high-quality materials and precision engineering, this claw is designed to meet the diverse needs of modern dairy farming.
