

## 0.6kg Milk Claw With Air Valve For Goat

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-M07
- Minimum Order Quantity: 1 Pcs
- Packaging Details: Carton
- Delivery Time: 7-10 woks day
- Payment Terms: T/T, Western Union
- Supply Ability: 5000 Pcs/Month

### Product Specification

- Right Lower Dia: 18.2mm
- Left/Right Upper Dia: 10mm
- Weight: 0.6kg
- Model: HL-M07
- Compatibility: Fits Most Milking Machines
- Left Lower Dia: 14mm
- Highlight: **0.6kg Milk Claw, Goat Milk Claw, Air Valve Milk Claw**

## Product Description

### Product Description:

The Milking Machine Claw, model HL-M07, is a crucial component in the cow milking claw assembly. Designed for efficient and gentle milking of dairy cattle, this suction claw for cattle is engineered with precision and durability in mind.

Featuring a Left/Right Upper Diameter of 10mm, the Milking Machine Claw ensures a secure and reliable connection to the milking system. The Right Lower Diameter of 18.2mm complements the overall design, facilitating optimal milk flow and suction during the milking process.

The Left Lower Diameter of 14mm further enhances the functionality of the milking machine claw, ensuring a balanced and effective milking experience for both the operator and the dairy cows. With a weight of 0.6kg, this claw assembly is lightweight and easy to handle, making it suitable for daily use in commercial dairy operations.

Constructed from high-quality materials, the Milking Machine Claw is built to withstand the rigors of daily milking routines. Its robust design and precise engineering ensure long-lasting performance and reliability, making it a valuable investment for dairy farmers and milk producers.

Whether you are a small-scale dairy farmer or a large commercial dairy operation, the Milking Machine Claw is designed to meet your milking needs with efficiency and effectiveness. Its ergonomic design and user-friendly features make milking sessions smoother and more productive, helping you streamline your dairy operations and improve overall milk production.

With the Milking Machine Claw, you can trust that your dairy cows are being milked safely and hygienically. The claw assembly's advanced design minimizes the risk of injury or discomfort to the cows, ensuring a stress-free milking process for both the animals and the operators.

Invest in the Milking Machine Claw today and experience the difference it can make in your dairy operation. From its precise engineering to its durable construction, this milking machine claw is a reliable choice for enhancing milk production and maintaining the health and well-being of your dairy herd.

### Features:

Product Name: Milking Machine Claw

Weight: 0.6kg

Left lower Dia: 14mm

Right lower Dia: 18.2mm

Model: HL-M07

Compatibility: Fits Most Milking Machines

### Technical Parameters:

Left lower Dia	14mm
Model	HL-M07
Left/Right Upper Dia	10mm
Weight	0.6kg
Compatibility	Fits Most Milking Machines
Right lower Dia	18.2mm

### Applications:

The Chuangpu HL-M07 Milking Machine Claw is a versatile and efficient product designed for milking cows in various settings. With its high-quality construction and innovative design, this milking claw is suitable for a wide range of applications.

Whether you are a small-scale dairy farmer or a large commercial operation, the HL-M07 milking claw is the perfect choice for your needs. Its compatibility with most milking machines ensures seamless integration into your existing setup, making it easy to upgrade or replace your current milking claw assembly.

The HL-M07 milking claw features a left and right upper diameter of 10mm, providing a secure and reliable connection to the milking machine. With a weight of 0.6kg, this milking claw is lightweight and easy to handle, reducing operator fatigue during milking sessions. Designed and manufactured in China, the Chuangpu HL-M07 Milking Machine Claw is built to last and withstand the rigors of daily use. Its right lower diameter of 18.2mm and left lower diameter of 14mm ensure a tight seal and efficient suction, making it an essential tool for milking cows.

Whether you are milking a small herd of cattle or a large group of dairy cows, the HL-M07 milking claw provides consistent and reliable performance. Its suction claw for cattle ensures gentle and efficient milking, promoting animal welfare and milk quality.

For all your milking needs, trust the Chuangpu HL-M07 Milking Machine Claw to deliver exceptional results every time. Upgrade your milking system with this high-quality and versatile milking claw for cows, and experience the difference in efficiency and productivity.
