Product Description:

The Stainless Steel Milk Shell is a crucial component in the milking process for cows, designed to protect the milking inflation and ensure its efficiency. With a weight of 71g, this durable milking shell cup is universally compatible and specifically crafted to withstand the rigors of daily use without being easily damaged.

Featuring a robust construction, the Stainless Steel Milk Shell is engineered to provide long-lasting protection for the milking inflation, safeguarding it from wear and tear. Its sturdy design ensures that it remains intact even in demanding milking environments, making it a reliable tool for dairy farmers and livestock handlers.

Designed for cows, this Stainless Steel Milk Shell is tailored to fit their anatomy and milk production requirements. Its universal compatibility allows it to be used with various milking equipment, making it a versatile accessory for dairy operations of different scales. With a focus on functionality, the primary role of the Stainless Steel Milk Shell is to protect the milking inflation during the milking process. By creating a secure and hygienic environment for milking, this essential component helps maintain the quality and safety of the milk output, ensuring that the dairy products meet high standards of production.

Investing in the Stainless Steel Milk Shell is a smart choice for dairy farmers looking to optimize their milking processes and improve overall efficiency. Its durable construction, coupled with its protective capabilities, makes it a valuable asset for maintaining the health and well-being of cows while ensuring the quality of the milk yield.

In conclusion, the Stainless Steel Milk Shell is a reliable and durable accessory that plays a vital role in protecting the milking inflation of cows during the milking process. Its universal compatibility, lightweight design, and focus on functionality make it an essential tool for dairy operations seeking to enhance their milking efficiency and maintain the quality of their dairy products.

Features:

Product Name: Milk-Shell

Weight: 71g

Durability: Durable

Size: 144mm/42mm/26mm

Material: Plastic

Name: Plastic Milking Cup

Technical Parameters:

Animal	Cow
Name	Plastic Milking Cup
Features	Durable And Not Easily Damaged
Function	Protect The Milking Inflation
Color	Brown
Compatibility	Universal
Weight	71g
Material	Plastic
Size	144mm/42mm/26mm
Shape	Round

Applications:

The Milk Shell product by Chuangpu, model number HL-MP27E, is a versatile item that can be used in a variety of occasions and scenarios. The Milk Shell, designed to cater to the needs of cow owners, comes in a stylish brown color with dimensions of 144mm in length, 42mm in width, and 26mm in height.

One of the primary applications of the Hairy Milk Shell is in dairy farming, particularly in the milking process of cows. The durable construction of the Milk Shell ensures long-lasting performance, making it suitable for daily use on the farm. Its round shape allows for

easy handling and efficient milk collection.
Furthermore, the Milk Shell can also be used in other settings such as milk processing plants where large quantities of milk are handled. Its efficiency and reliability make it a valuable tool in ensuring smooth operations and high productivity.
In addition to cow milk, the Milk Shell can also be utilized for handling goat milk. The adaptable design of the Goat Milk Shell allows for seamless transition between different types of milk, making it a versatile option for farmers who work with multiple animals.
Originating from China, the Milk Shell combines quality craftsmanship with practical functionality. Whether used in small-scale dairy farms or industrial milk production facilities, the Milk Shell proves to be a valuable asset in the milk collection process.
Overall, the Milk Shell by Chuangpu is a must-have tool for dairy farmers looking to streamline their operations and enhance efficiency in milk handling. Its reliable performance, durable build, and adaptable nature make it a versatile solution for a wide range of milk collection needs.
