### Product Description:

The Milk Shell product, also known as the Boumatic Milking Teat Cup, is a high-quality milking accessory designed for efficiency and durability. Its round shape and universal compatibility make it suitable for use in various milking setups, ensuring a seamless milking process.

Constructed from premium stainless steel, the Milk Shell is built to last. Its durable material ensures that it is not easily damaged, providing a reliable and long-lasting solution for dairy farmers.

Whether you are milking cows, goats, or other dairy animals, the Milk Shell's design and quality make it a versatile and essential tool for your milking needs.

### Features:

Product Name: Milk Shell

Function: Protect The Milking Inflation

Durability: Durable

Material: Stainless Steel

Color: Silver

Features: Durable And Not Easily Damaged

### Technical Parameters:

Material	Stainless Steel
Weight	185g
Compatibility	Universal
Shape	Round
Features	Durable And Not Easily Damaged
Function	Protect The Milking Inflation
Durability	Durable
Color	Silver
Animal	Cow
Size	144mm/44mm/18.5mm

### Applications:

The Chuangpu HL-MP27C Milk Shell is a high-quality product designed for various applications in the dairy industry. Its durable stainless steel construction ensures long-lasting performance, making it suitable for both commercial and personal use.

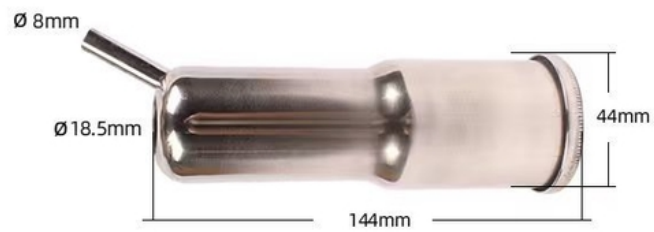

The round shape of the Milk Shell is specifically engineered to protect the milking inflation during the milking process, ensuring efficient and safe milk extraction. This makes it an essential tool for dairy farmers looking to optimize their milking operations.

Whether you are milking cows on a small farm or managing a large-scale dairy operation, the Chuangpu Milk Shell is a versatile product that meets the needs of different users. Its compact size of 144mm/44mm/18.5mm makes it easy to handle and store, adding to its practicality.

One of the key application scenarios for the Milk Shell is during the milking process itself. By attaching the Milk Shell to the milking inflation, it helps to maintain proper suction and prevent contamination of the milk. This is crucial for ensuring the quality and hygiene of the milk produced.

Additionally, the Milk Shell can also be used in conjunction with other milking equipment such as Plastic Milk Shells and Milk Cups to create a complete milking system. This versatility allows dairy farmers to customize their milking setup according to their specific requirements.

Originating from China, the Chuangpu HL-MP27C Milk Shell embodies the quality and craftsmanship associated with Chinese manufacturing. Its reputation for reliability and performance makes it a trusted choice for dairy farmers around the world.

weight: 185g
