

Cow Farm Equipment Cattle Using 1.5M Anti-splitting Straps for Preventing Sports Injuries

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-Q6PX
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 7-10 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000PCS /Month

Product Specification

- Width: 4CM
- Length: 1.5M
- Name: Anti-split Belt
- Maintenance: The Anti-split Belt Should Be Tightened Appropriately; Excessive Tightness Can Affect Normal Activities And Requires Regular Inspection And Adjustment.
- Material: Nylon
- Thickness: 0.25CM
- Payment: T/T, Western Union
- Model: HL-Q6PX
- Highlight: **cattle anti-splitting straps, farm equipment anti kick bar, 1.5m cow sports injury prevention**

Product Description:

The Cow Farm Equipment product we offer is the Anti-split Belt, designed specifically to cater to the needs of cattle rearing machinery in livestock facilities. Made from high-quality Nylon material, this product ensures durability and longevity, making it a reliable choice for farmers and ranchers.

The Anti-split Belt, model HL-Q6PX, is an essential tool in the arsenal of Mooing Pasture Devices, providing a practical solution for preventing cows from falling and injuring themselves. With a thickness of 0.25CM, this belt is sturdy enough to withstand the rigors of daily use on the farm.

Whether you are a seasoned farmer or just starting in the livestock industry, having the right equipment is crucial for the well-being of your animals. The Anti-split Belt offers a simple yet effective way to secure your cows and ensure their safety while they graze in the pasture. By investing in our Cow Farm Equipment, you are not only prioritizing the welfare of your livestock but also streamlining your daily operations. With easy-to-use features and a reliable design, the Anti-split Belt can help improve efficiency and productivity on your farm. Upgrade your livestock facility supplies today with the Anti-split Belt and experience the difference it can make in your cattle rearing practices. Trust in our quality products to provide you with the tools you need to succeed in the competitive world of agriculture.

Cattle use anti-splitting straps (also known as anti-cheating straps or leg protection straps) mainly for the following reasons:

1. Prevent Sports Injuries

When cows are walking, running, or working, their hind legs may accidentally split (spread their legs too wide) due to slippery ground, sharp turns, or physical weakness. This kind of movement can easily lead to muscle strains, ligament tears, or even hip dislocations. The splits prevention belt can limit the excessive separation of the back legs, reducing the risk of injury.

2. Protecting Breeding Female Cattle

The pelvic area of pregnant cows or cows that have just given birth is relatively fragile. The anti-split belt can stabilize the rear end and prevent pelvic damage caused by sudden splitting, which could affect fertility.

3. Assisted Rehabilitation Therapy

If the cow already has leg injuries, the anti-split belt can limit mobility to prevent secondary damage while helping maintain balance during recovery.

4. Adapt to Special Environments

On sloped ground, muddy fields or during transportation, cows can easily lose balance, and anti-splits straps serve as temporary protection measures.

Note: The anti-split belt needs to be tightened appropriately; excessive tightness can affect normal activities and requires regular inspection and adjustment. In modern farming, the use of such tools is considered in terms of animal welfare to ensure necessity.

Features:

Product Name: Cow Farm Equipment

Usage: Tied To The Cow's Leg To Prevent It From Falling

Length: 1.5M

Name: Anti-split Belt

Thickness: 0.25CM

Width: 4CM

Technical Parameters:

Length	1.5M
Name	Anti-split Belt
Material	Nylon
Model	HL-Q6PX
Thickness	0.25CM
Payment	T/T, Western Union
Usage	Tied To The Cow's Leg To Prevent It From Falling
Animal	Cow, Cattle

Maintenance	The Anti-split Belt Should Be Tightened Appropriately; Excessive Tightness Can Affect Normal Activities And Requires Regular Inspection And Adjustment.
Width	4CM

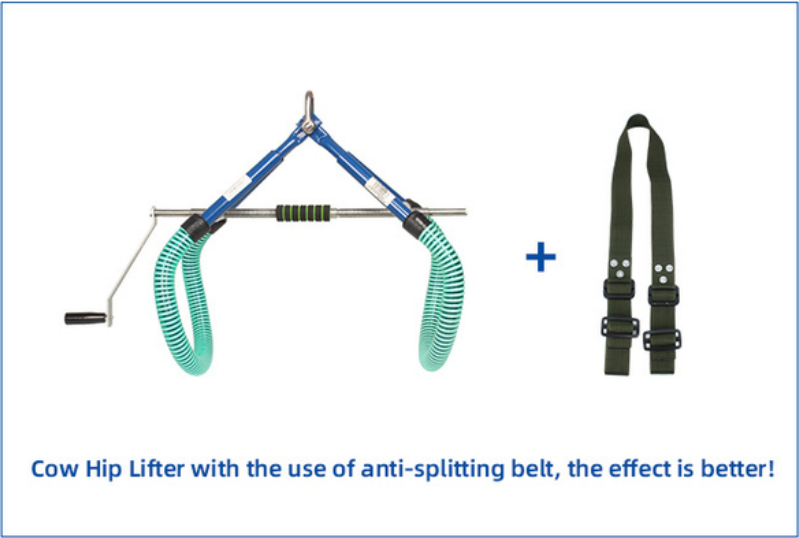

Applications:

The Chuangpu HL-Q6PX Anti-split Belt is a crucial piece of cattle rearing machinery designed for ensuring the safety and well-being of cows in various farm settings. Originating from China, this innovative product is crafted from durable nylon material, offering reliability and longevity in its performance.

One of the key applications of the HL-Q6PX Anti-split Belt is in calf farming, where young and vulnerable calves need extra care and support to prevent accidents and injuries. By using this belt, farmers can securely tie it to the cow's leg, effectively preventing any potential falls or mishaps, especially during the early stages of calf development.

Whether it's a small-scale dairy farm or a large commercial cattle operation, this anti-split belt plays a vital role in herd maintenance gear, ensuring the safety and stability of the livestock. Its 1.5m length provides ample flexibility and coverage, suitable for different sizes and breeds of cows.

For farmers and ranchers looking to enhance their cattle management practices, the Chuangpu HL-Q6PX Anti-split Belt is a reliable and practical solution. With payment options including T/T and Western Union, acquiring this essential calf farming appliance is convenient and hassle-free.

PRODUCT PARAMETERS

WE ALWAYS ADHERE TO RIGOROUS MANAGEMENT, THE FOUNDATION OF METICULOUS MANUFACTURING,
PRODUCE PRODUCTS THAT MEET THEMARKET'S RULES AND CUSTOMER NEEDS

- Product name: Anti-splitting belt for cow
- Product material: nylon
- Product Model: HL-Q6PX
- Product use: prevent cattle from standing without slipping
to reduce cattle damage
- Applicable objects: Cow, sheep

Total unfolded length: 150cm Thickness: 0.25cm
