Product Description:

The Cow Drencher product is an essential tool for efficiently administering liquids to dairy cows. Manufactured in China, this drencher is made from high-quality Stainless Steel 304, ensuring durability and longevity in its performance. Key parts of the Cow Drencher include the SS304 Spring Tube, Inner Hardness Tube, Detachable Switch, and PVC Tube. These components work together seamlessly to provide a reliable and effective drenching solution for dairy cows. The Cow Drencher is designed to be matched with a Cow Drenching Cylinder for feeding purposes. This compatibility ensures that the drencher can be easily integrated into existing cow feeding systems, making it a versatile and practical tool for dairy farmers. Whether used in Cow Sprinkler Systems, Milk Cow Mistlers, or Heffer Fluid Applicator setups, the Cow Drencher excels in delivering liquids accurately and efficiently to dairy cows. Its sturdy construction and reliable performance make it a valuable asset for any dairy farm looking to streamline their feeding process.

Features:

Product Name: Cow Drencher
Tube Feature: Withstands Temperatures Down To -140 Degrees
Parts Contain:
SS304 Spring Tube
Inner Hardness Tube
Detachable Switch
PVC Tube
Animal: Dairy Cow
Application: Be Matched With Cow Drenching Cylinder For Feeding
Function: Administering Liquid Medication To Cows After Giving Birth To Baby

Technical Parameters:

Usage	Oral Drencher
Animal	Dairy Cow
Material	Stainless Steel 304
Function	Administering Liquid Medication To Cows After Giving Birth To Baby
Model	HL-Q1-II-1
Application	Be Matched With Cow Drenching Cylinder For Feeding
Country Of Origin	China
Feeding Tube Length	158CM
Parts Contain	SS304 Spring Tube, Inner Hardness Tube, Detachable Switch, PVC Tube
Tube Feature	Withstands Temperatures Down To -140 Degrees

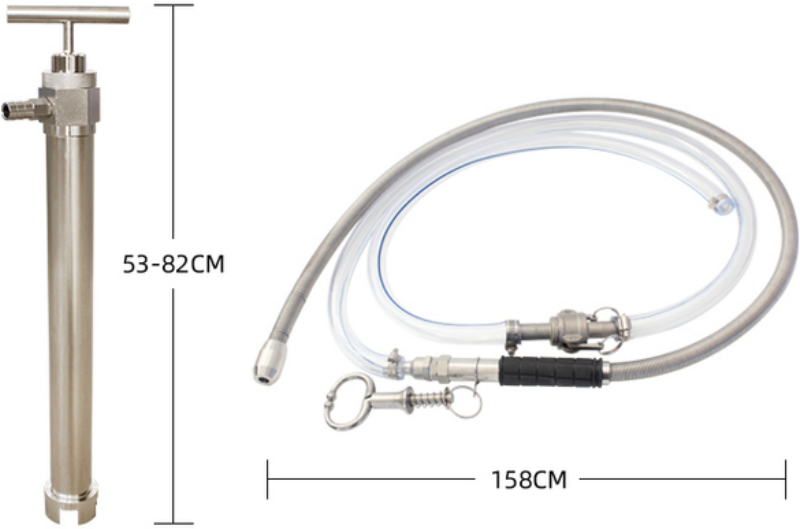

Applications:

Product Application Occasions and Scenarios for the Chuangpu HL-Q1-II-1 Cow Drencher:
The Chuangpu HL-Q1-II-1 Cow Drencher, originating from China, is a versatile oral drencher designed specifically for dairy cows. With a feeding tube length of 158cm, this Heffer Fluid Applicator is ideal for administering liquid medication to cows, especially after giving birth to a baby calf. One of the standout features of this Cow Drencher is its tube that can withstand temperatures as low as -140 degrees, making it suitable for a variety of weather conditions and environments. This durability ensures that the drencher remains functional and reliable even in extreme cold conditions, providing peace of mind to users. The Chuangpu HL-Q1-II-1 Cow Drencher is perfect for use in dairy farms and cattle ranches where the health and well-being of cows are

of utmost importance. Whether it's for routine healthcare procedures or administering specific medications, this drencher offers ease of use and efficiency in the process. Additionally, the versatility of this Beef Cattle Sprayer extends to scenarios where quick and precise administration of fluids is required. The drencher's design allows for accurate dosing and controlled delivery of liquid medication, ensuring that the cows receive the necessary treatment without any hassle. In conclusion, the Chuangpu HL-Q1-II-1 Cow Drencher is a reliable and practical tool for farmers and ranchers dealing with dairy cows. Its functionality, durability, and ease of use make it a valuable asset in the management of cow health, particularly in scenarios such as post-partum care and medication administration.
