Product Description:

The Cow Drinking Trough is a versatile and durable herd watering trough designed to meet the hydration needs of cows, goats, horses, and deer on ranches and farms. With an insulation layer thickness of 40-50mm, this watering hole ensures that the water remains at an optimal temperature regardless of external conditions, making it suitable for use in various environments.

Constructed from high-quality stainless steel, this farm water trough is built to withstand rugged conditions and frequent use, providing long-lasting performance and reliability. The material also ensures that the water remains clean and free from contaminants, promoting the health and well-being of the animals drinking from it.

Measuring 2000mm in length, the Cow Drinking Trough offers ample space for multiple animals to hydrate simultaneously, reducing competition and ensuring all animals have access to fresh water. The generous length also makes it suitable for larger herds or groups of animals, making it a practical and efficient solution for ranches and farms of all sizes.

Equipped with an electric heating bar, this ranch watering trough prevents water from freezing during cold weather, ensuring continuous access to water for the animals. The electric heating feature helps maintain the water temperature within a safe range, preventing freezing and ensuring that the animals can stay hydrated even in harsh winter conditions.

Whether it's for cows, goats, horses, or deer, the Cow Drinking Trough is a reliable and essential watering solution for any farm or ranch. Its durable construction, efficient insulation, and electric heating capabilities make it a practical and convenient choice for ensuring the hydration needs of animals are met year-round.

Features:

Livestock Drinking Trough: Cow Drinking Trough

Outer Thickness: 1.2mm (Outer Layer)

Voltage: 220V-50Hz

Material: Stainless Steel

Water Filling: Float Ball Automatic Water Inlet Control

Electric Heating: Electric Heating Bar

Dairy Cow Water Tank

Pasture Drinking Basin

Technical Parameters:

Insulation layer thickness:	40-50mm
Material:	Stainless Steel
Length:	2000 Mm
Payment Term:	FOB Or CIF
Product Usage:	For Animals To Drink Water
Animal:	Cow, Goat, Horse, Deer
Model:	HL-MP13
Voltage:	220V-50Hz
Inner Thickness:	1.5mm (inner Layer)
Product Country Of Origin:	China

Applications:

The Chuangpu HL-MP13 Cattle Watering Trough is a reliable and efficient solution for providing water to cows, goats, horses, and deer in various settings. With a length of 2000 mm, this stainless steel Cow Water Tank is designed to withstand the demands of agricultural environments.

Whether you are a farmer, rancher, or livestock owner, this Livestock Drinking Trough is suitable for a wide range of application occasions

and scenarios. Here are some of the key use cases for the Chuangpu HL-MP13:

1. Farming Operations: The Cow Water Tank is ideal for use in farming operations where a continuous and reliable source of water is essential for the well-being of livestock. It can be easily integrated into existing watering systems or used as a standalone solution.
2. Grazing Pastures: For cattle, goats, horses, and deer grazing in pastures, having access to a Cattle Watering Trough is crucial for maintaining hydration levels, especially during hot weather. The Chuangpu HL-MP13 can be strategically placed in different areas of the pasture for convenient access.
3. Animal Husbandry Facilities: Livestock facilities such as dairy farms, goat farms, and horse stables can benefit from the durability and efficiency of this Livestock Drinking Trough. Its stainless steel construction ensures longevity and easy maintenance, making it a cost-effective choice for busy animal husbandry operations.
4. Wildlife Conservation Areas: In wildlife reserves or conservation areas where deer and other wild animals roam freely, providing a reliable water source is important for their survival. The versatility of the Chuangpu HL-MP13 makes it suitable for use in various wildlife management scenarios.

When it comes to purchasing the Chuangpu HL-MP13 Cattle Watering Trough, customers have the flexibility to choose their preferred payment term, whether it's FOB or CIF. This product, originating from China, operates at a standard voltage of 220V-50Hz, ensuring compatibility with most electrical systems.
