

Electric Dairy Cow Barn Fan 1mm Blade Thickness and Long-Lasting Performance

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP17
- Minimum Order Quantity: One Set
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 7-10 working days
- Payment Terms: T/T, L/C, Western Union, MoneyGram
- Supply Ability: 500SETS/Month

Product Specification

- Mounting Type: Wall Mount
- Protection Level: IP55
- Noise Level: 69 DB
- Model: Farm Fan
- Blade Thickness: 1mm
- Power Source: Electric
- Wattage: 550W
- Animal: Cow, Cattle, Goat

Product Description:

The Cow Barn Fans are an essential component of efficient Cattle Barn Ventilation Systems, designed to provide optimal airflow and cooling for livestock barns. With a wattage of 550W, these fans are powerful yet energy-efficient, making them ideal for continuous use in bovine enclosures.

Featuring a fan diameter of 1m and equipped with 4 blades, these Livestock Barn Air Circulators are specifically crafted to deliver high-volume airflow with precision and effectiveness. The number of blades ensures a consistent and steady flow of air throughout the barn, promoting a comfortable environment for the cattle.

The mounting type of these fans is Wall Mount, which offers easy installation and convenient placement within the barn structure. By mounting the fans on the wall, they can optimize air circulation without occupying valuable floor space, making them a practical choice for livestock barns of all sizes.

With an impressive airflow capacity of 32000m³/h, these Bovine Enclosure Air Movers can effectively distribute fresh air and maintain proper ventilation within the barn. The high airflow capacity ensures that the air is circulated efficiently, helping to regulate temperature and reduce humidity levels for the well-being of the cattle.

Features:

Product Name: Cow Barn Fans
 Number Of Blade: 4
 Mounting Type: Wall Mount
 Fan Diameter: 1m
 Blade Material: 430 # Stainless Steel
 Protection Level: IP55

Technical Parameters:

Power Source	Electric
Wattage	550W
Airflow Capacity	32000m ³ /h
Blade Material	430 # Stainless Steel
Mounting Type	Wall Mount
Number Of Blade	4
Fan Diameter	1m
Animal	Cow, Cattle, Goat
Voltage	380V 50Hz
Blade Thickness	1mm

Applications:

The Chuangpu HL-MP17 Cow Barn Fans are versatile and powerful air circulation units designed specifically for cow barns and livestock facilities. With their high-quality construction and efficient performance, these fans are ideal for a variety of product application occasions and scenarios:

- Cow Shed Air Circulation Units:** The Chuangpu HL-MP17 fans are perfect for improving air circulation within cow sheds, helping to reduce heat stress and improve overall air quality for the cows. The fans can be strategically placed to ensure optimal air movement throughout the entire barn, creating a more comfortable environment for the animals.
- Cow Barn Cooling Units:** In hot and humid climates, maintaining a cool environment in the cow barn is essential for the health and productivity of the cows. The Chuangpu HL-MP17 fans can be used to provide effective cooling by circulating air and creating a breeze that helps lower the ambient temperature in the barn.
- Livestock Barn Air Circulators:** These fans are not limited to just cow barns; they can also be used in other livestock facilities such as

cattle and goat barns. The powerful airflow and durable construction make them suitable for a wide range of livestock applications, helping to improve ventilation and create a more comfortable living environment for the animals. With a noise level of 69 dB and a protection level of IP55, the Chuangpu HL-MP17 fans are designed to operate quietly and reliably even in demanding agricultural environments. The silver/blue color and 430 # stainless steel blade material not only provide a sleek and modern look but also ensure durability and longevity. Manufactured in China, these Cow Barn Fans from Chuangpu are a must-have solution for farmers and livestock owners looking to enhance air circulation, cooling, and overall comfort in their animal housing facilities.
