Price Descriptions

Components include milking units (bucket, liner, teat cup shell, claw, pulsator) and 250L vacuum pump (oil pot, silencer, belt, pulley).

Similar to mobile milking machines, this unit can milk cows, goats and sheep by changing the milking cluster group. Milking bucket quantity can range from 1 to 16. Milking time is approximately 5-6 minutes per cow (shorter for goats).

Ideal portable solution for small cow barns and goat breeding farms. Increases efficiency as one worker can operate 6-8 milking buckets. Available with electric motor or diesel/gasoline engine option for power outages.

Optional transparent milk buckets (25L or 32L) with measurement scales available.
