

## 220V/50-60Hz Cow Milking Machine with 25L Stainless Steel Bucket for 5-6 Cows/Min Dairy Farms

Our Product Introduction

for more products please visit us on [mobilemilkingmachine.com](http://mobilemilkingmachine.com)

### Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: HAILIAN
- Minimum Order Quantity: 1
- Price: \$500

### Product Specification

- Model: HL-JN10
- Voltage: 220V / 50-60Hz
- Power: 2200w
- Working Vacuum: 50kpa
- Pulsation Ratio: 60:40
- Pulsator Frequency: 60-80 Times/min
- Milking Time: 5-6 Min/cow
- Productivity: 5-6 Cows/min
- Bucket Capacity: 25L
- Pump Capacity: 550L Or 850L
- Weight: 300
- Bucket Quantities: 1pcs To 10pcs
- Milking Cluster: 1 Set To 10 Sets
- Worker Requirement: 1
- Stainless Steel: Yes

## Product Description

### HL-JN10 Pail Bucket Cow Milking Machine

#### Product Specifications

Model	HL-JN10
Item	Bucket Cow Milking Machine
Milking Time	5-6 min/cow
Pulsator Frequency	60-80 times per minute
Voltage	220V / 50-60Hz (customizable)
Power	2200w
Pump Capacity	550L or 850L (based on bucket quantity)
Bucket Quantities	1 to 10 buckets (expandable)
Milking Cluster Group	1 to 10 sets
Worker Requirement	1 operator
Usage	Dairy cow farms

### Key Features

- HL-JN10 pail bucket milking machine design
- Specifically designed for dairy cows
- 240 voltage, 50-60Hz operation
- Comprehensive technical support included

### Product Description

The HL-JN10 Bucket Cow Milking Machine includes complete milking units featuring stainless steel milking buckets, milking liners, teat cup shells, milking claws, and milking pulsators. Powered by a 550L or 850L vacuum pump with oil pot, silencer, belt, and pulley components.

This versatile milking machine operates similarly to mobile milking systems and can be used for cows, goats, and sheep by simply changing the milking cluster group. The system supports 1 to 16 milking buckets with varying milking times: 5-6 minutes per cow and shorter durations for goats. Ideal as a portable milking solution for small cow barns and goat breeding farms, this equipment significantly reduces labor costs as one operator can efficiently manage 6-8 milking buckets simultaneously.

The HL-JN10 offers flexible power options with both electric motor and diesel/gasoline engine configurations, ensuring continuous operation during power outages. Available milk buckets include transparent 25-liter and 32-liter options with measurement scales for direct milk quantity assessment during milking operations.

### Applications

- Suitable for cows, goats, and sheep milking operations
- Annual replacement recommended for spare parts
- Ideal for both commercial dairy farms and household use
- Available for international retailers and distributors

## Competitive Advantages

- Portable milking equipment for multiple animal types
- Easy to transport and operate with minimal training
- Customizable voltage options for international markets
- Comprehensive 1-year warranty with lifetime technical support
