- Versatile for multiple animal types

#### Product Description

The HL-JN10 Cow Milking Machine is a portable milking system designed for efficiency and flexibility. This mobile milking machine can be used for cows, goats, and sheep by simply changing the milking cluster group. The system supports 1 to 16 milking buckets, with milking times of approximately 5-6 minutes per cow and shorter times for goats.

This pail bucket milking machine is an ideal solution for small cow barns and goat breeding farms, helping to save time and reduce costs. One operator can efficiently manage 6-8 milking buckets simultaneously. The system can be powered by electric motors, diesel, or gasoline engines, ensuring continuous operation even during power outages.

Available with transparent milk buckets in 25-liter and 32-liter capacities, both featuring measurement scales for direct milk quantity assessment during milking operations.
