1x 9 Automatic Cow Herringbone Milking Parlor with Waikato Milk Flow Meter

Quick Detail:

- single line milking parlor
- Suitable for dairy cows
- Electrical motor driven

Descriptions:

Single line milking parlor, sucking milk in one side, it is more suitable for some farms who has small space for building parlor. It can transmit milk into milk receiver group directly. Also could wash system automatically, is suitable for cows, goats and sheep, just changing the milking cluster group. According to the cows, or goats quantity, the milking positions could be from 1 to 16. For each cow, the milking time need about 5 - 6 minutes, for goats, the time will be shorter. The pipeline milking machine is the ideal milker for small cow barns and goats breeding farms. It could help people saving time and cost, because one worker could operate 6-8 milking buckets.

One set milking parlor need vacuum pump, vacuum meter, vacuum regulator, oil pot, silencer, belt, pulley, milk receiver group, milking claw, milking pulsator, milk tube, pulse tube, milk liner, milk shell and other necessary parts.

Applications:

- cow milking: with stainless steel teat cup, long milk liner and pulse short tube, milk claw;
- goat milking: with goat milk liner and milk shell, also goat milk claw
- shee milking: same with goat milking
