

## Dairy Cow Farm Milk Cooler Tank CE Certificate With 6000L Capacity

Our Product Introduction

for more products please visit us on mobilemilkingmachine.com

### Basic Information

- Place of Origin: China (Mainland)
- Brand Name: HL
- Certification: ISO9001: 200, ISO9001-2008
- Model Number: HL-MC6000
- Minimum Order Quantity: One set
- Price: Negotiation
- Packaging Details: Pallet
- Delivery Time: 15-30 days
- Payment Terms: T/T, Western Union, MoneyGram, Paypal
- Supply Ability: 30sets/Month

### Product Specification

- Item: Cow Farm Milk Cooling Tank
- Type: Horizontal / Direct
- Capacity: 6000L
- Voltage: 380V / 50Hz
- Power: 12KW
- Weight: 1150KGS
- Highlight: milk storage tank, mueller milk tanks

## Product Description

### Dairy Cow Farm Milk Cooler Tank CE Certificate With 6000L Capacity

#### Quick Detail:

- **Item:** dairy cow farm milk cooling tank
- **Capacity:** 6000L
- **Material:** double-wall SS304 stainless steel material
- **Compressor:** with Copeland compressor
- **Insulation layer:** 60mm - 80mm thickness
- **Insulation material:** poly prethane material
- **Structure:** horizontal type milk chiller tank
- **Refrigerant:** R404A(recommended) or R22

#### Description:

The dairy cow farm milk cooling tank is mainly used in cooling and storage fresh milk, plasma, raw juice and other liquid which need cooling. The dairy cow farm milk cooling tank body has 2 layers, 1.50mm outer thickness and 2.00mm inner thickness, and the dairy cow farm milk cooling tank has 60-80mm thickness insulation layer which has good heat preservation effect, also the fresh effect. We utilize the international advanced technology and equip with the importing compress machine which could keep the dairy cow farm milk cooling tank with a long time service life. One micro computer monitor could help the end user in operating the cooling system. People could control the cooling temperature through control panel and achieve ideal cooling effect. The dairy cow farm milk cooling tank has manual agitator, or automatic agitator in helping user to mixing the liquid.

The dairy cow farm milk cooling tank is the most favorable cooling and storage equipment for dairy farm, milk factory, milk collecting station, food factory, beverage factory and pharmacy industry.

#### Features:

- design of horizontal cylindrical stainless steel tank body, easy and convenient opening.
- with smooth head, without any dead angle, and be convenient for cleaning.
- suitable for big dairy and large scale milk station, with the features of good unity, space saving, easy to install, a rapid refrigeration and easy to operate.
- with polyurethane foam (60-80mm thickness) to keep thermal insulation.
- with metal support which could fully support the tank body.
- with control panel and digital could be display.
- with double-walled stainless steel, resistance to high temperature and corrosion resistance.
- with American Copeland brand compressor, which has a long time use life.

#### Application:

The dairy cow farm milk cooling tank is mainly used in chilling / cooling the liquid, preserving the liquid in an ideal temperature and preventing the bacterium or deterioration, especially for cooling milk, this dairy cow farm milk cooling tank plays an important role. The dairy cow farm milk cooling tank is the normal colling equipment for large pasture and farms, milk station, milk factory, food and beverage industry factories.

#### Specification:

Volume	6000Liter
Type	horizontal
Compressor Power	12kw
Compressor Brand	Copeland
Layer	double-walled, SS304 material
Thickness	Inner: 2.00mm; Outer:1.50mm
Refrigerator	22R
Cooling Capacity	37300w
Temperature	adjust automatic
Temperature range	-10 ° C -50 ° C
Agitator	manual or automatic
Agitator power	500w
Agitator rotate speed	30-37r/min
Dimension(LxWxH)	3500mm*2100mm*1650mm
Weight	1150kgs
Insulated Layer	60-80mm
Support material	metal

#### Competitive Advantage:

1. From 500L to 10000L capacity for clients choosing;

2. Copeland compressor keep the chiller tank with a long time service life;
3. Reasonable layout design, easy to ship, install, operate and maintain;
4. Special material has good heat preservation and fresh effect during using;
5. Strong metal support could keep the tank body with a good safety and stability.
