Product Description

Automatic Sheep Milking Claw Mobile Milking Machine Replacement Parts

Quick Details:

- The automatic sheep milking claw, it is used for goat or sheep milking machine, the HL-M11 model, with ITP207 code reference
- The automatic sheep milking claw is an automatic type goat or sheep milk claw collector / milk cluster.
- The automatic sheep milking claw be with the function of connection goat mik liner and milk tube and air tube

Specification:

Item	automatic sheep milking claw	
Model	HL-M11	HL-M10
Type	automatic	semi-automatic
Referencing Code	ITP207	ITP205
Suitable Liner	HL-M14	HL-M15

Description:

The automatic sheep milking claw for collecting milk sucked from goat's or sheep teats through teat cup liners and sending it to a vacuum milking machine.

The HL-M11 automatic sheep milking claw, suitable for goats and sheep milking, is made of high impact resistant materials and has a rounded smooth half-barrel shape. The automatic sheep milking claw is an individual milking clawpiece incorporating a shut-off mechanism which automatically controls the vacuum supply to each liner during both milking and washing. As soon as the teat enters the liner, the valves on the HL-M11 automatic sheep milking claw automatically open. Then, when the teat is removed at the end of milking, rapid air intake creates a vacuum in the valve which automatically closes it.

Regarding the automatic sheep milking claw, automatic operation gives a range of benefits:

- Less work for the operator during milking and washing.
- Valves close automatically if the cluster is kicked off.
- Ability to isolate an unhealthy teat during milking.
- Easy to inspect for cleaning and maintenance.
- Less vacuum fluctuation when liners are fitted and removed, thus avoiding vacuum drop or intake of dirt.

Importance:

- The automatic sheep milking claw, the most important component for milking machine & milking parlor system, be used to connect milk tube, pulse tube and milk liners, and then collecting and delivering the fresh milk. As one of the most important spare parts for the milking machine system, we supply various types milk claw for cows, cattle, goats and sheep like 240CC, 300CC, 400CC, 350CC and others.
- The automatic sheep milking claw is an important part for the milking cluster group, and all model milking clusters can be available with or without vacuum shut-off valves with switch.
- The milking claw builds a conveniently positioned hook that allows to easily be fixed between milking.
- A transparent cover makes it easy to follow the milk flow and view the milk clearly. (claw milk claw)
- A rubber bumper reduces the risk of breakage if the claw drops. (cow milk claw)
- Cow milking claw bowl is made of PSU material, or PC material. Inox bottom (stainless steel 304 base) or plastic base could meet different clients request and usage.

Application:

The automatic sheep milking claw is used for connecting milk tube, pulse tube and milk liners, and then collecting milk sucked from goat's or sheep teats through teat cup liners and sending it to a vacuum milking machine.
