#### Description:

The electric motor piston mobile milking machine is different from the vacuum pump type milking machine, it does not the vacuum pump oil and the milk pulsator, the electric motor piston mobile milking machine contains electric motor, piston pump, vacuum meter, transparent milk tube, transparent pulse tube, milking cluster group, one stainless steel milk bucket and painted iron frame / brackets. This electric motor piston mobile milking machine could operate movably, convenient and flexible and no space constraints.

The electric motor piston mobile milking machine is also suitable for different animals for milking, like cows / cattle, yak, goats, sheep, camel, just changing the milk cup group / milking cluster group. The electric motor piston mobile milking machine uses stainless steel milk bucket to collect and storage the milk. This electric motor piston mobile milking machine is popular in many small and medium farmers, who has about 10 - 12 dairy cows, or 20 - 30 dairy goats /sheep milking.

The electric motor piston mobile milking machine is very popular in Russia, it is more economical for farmers than the vacuum pump milking machine.

The stainless steel milk bucket could use transparent milk bucket to replace, which could observe the fresh milk in the milk bucket directly, and it has the double scale on the milk bucket, so it is easy to measure the milk output.

This electric motor piston mobile milking machine has one year warranty, but it could be used for more than 7 - 8 years, except for the wearing parts. Usually the wearing parts(milk liner, milk tube and pulse tube) need change after one year. Technical supporting offered by us forever.

#### Advantages:
