

Dairy Farm Rotary Vane Part Of Vacuum Pump For Milking Machine

Our Product Introduction

for more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China Mainland
- Brand Name: HL
- Certification: ISO
- Model Number: HL-V01
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: Wooden Crate
- Delivery Time: 5 - 7 days
- Payment Terms: T/T, Western Union, Pypal
- Supply Ability: 500 sets / month

Product Specification

- Item: Vacuum Pump Fiber Vane
- Model: HL-V01
- Length: 164mm
- Width: 60mm
- Thickness: 6mm
- Vacuum Pump: 1200L Vacuum Pump
- Highlight: dairy vacuum pump, milking machine vacuum pumps

Product Description

Dairy Farm Rotary Vane Part Of Vacuum Pump For Milking Machine

Quick Details:

Name: vacuum pump fiber vane , milking vacuum pump replacement

Size: 164x60x6mm

Material: fiber

Range: apply to 1200L vacuum pump

Vacuum Pump Information:

- Capacity: 1200L
- Material: cast iron
- Vacuum pump degree: 50Kpa with adjustable
- Motor: 4kw
- Range: used for milking machine and milking parlor system

Application:

The vacuum pump fiber vane is one of most important part for the vacuum pump which is the heart of the milking machine. The function of vacuum pump is to extract air from the milking machine system through the belt driven.

Features:

- The fiber vane has a higher flexural strength, it is not easy to deformation and bending.
- It has smaller density than iron, so the centrifugal force is small, it will not wear casing wall.
- With high temperature resistance, it is suitable for 350 - 800 °C.
- With high hardness, on the premise of sufficient oil lubrication, the vacuum pump is very abrasion resistant and durable.

Components:

One whole set milk vacuum pump consists of vacuum pump, silencer (stainless steel muffler), oil can (oil pot), belt (pulley) and vacuum pump pallet and some rubber parts.

Description:

The vacuum pump fiber vane is made of phenolic resin fiber material, named Kevlar. It is the wearing part of vacuum pump, and vacuum pump is the heart of the milking machine. Regular servicing helps preserve the vacuum reserve. Various capacity vacuum pump need different specification vacuum pump pallet. The heavy duty body of the rotary vane vacuum pump is constructed from chemical resistant cast iron, making it durable to any environmental working conditions.

The function of vacuum pump is to extract air from the milking machine system through the belt driven. This milking machine vacuum pump gives flexibility with speeds ranging from about 800-1500 r/min and a corresponding angel of pump capacities to suit different sizes of milking machines.

Specification:

Capacity (L/min)	250	300	550	850	1500	2100
Pump Speed (r/min)	1440	1440	1440	1440	1440	1440
Vacuum Degree(Kpa)	50	50	50	50	50	50
Noise (Db(A))	≤50	≤50	≤60	≤70	≤70	≤70
Ultimate Vacuum(Mp)	≤90	≤90	≤90	≤90	≤90	≤90
Motor Power(kw)	1.1	1.1	2.2	3	4	5.5
Weight(kg)	13.5	14	31	36	57.5	69.5
Size(L×W×H) (mm)	230*220*220	230*220*220	280*270*220	300*220*220	430*230*230	390*290*290

Note: The above parameters for reference only!
