

Dairy Milk Machine Parts Electronic Milk Pulsator LE30 with 2 Plastic Tube

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: CHUANG PU
- Certification: ISO, CE
- Model Number: HL-P06B
- Minimum Order Quantity: One piece
- Price: Negotiation
- Packaging Details: Carton
- Delivery Time: 5 - 8 working days
- Payment Terms: T/T, Western Union, Paypal
- Supply Ability: 1000 pieces/Month

Product Specification

- Name: Electronic Pulsator
- Model: LE30
- Type: Electronic
- Material: Thermal Plastic
- Port: 2 Plastic Ports
- Type Of Animal: Cow, Sheep, Goat.
- Highlight: vacuum pulsator, milker pulsator

Product Description

Dairy Milking Machine Electronic Pulsator LE30 with 2 Plastic Tube

Dairy Electronic Pulsator Quick Details:

- Item: electric milk pulsator
- Model: LE30
- Type: electric pulsator
- Cover Material: plastic
- Type of Animal: Cow, sheep, goat.

Milk Pulsator is one of the most important parts in milking system, There are 2 types of pulsator. Pneumatic milking Pulsator and Electronic Milking Pulsator.

L02, L80, L90 pulsator are all InterPuls type Pulsator, Which were designed for heavy duty working condition,

L80 Milk Pulsator and L90 Milk Pulsator be designed for heavy duty working conditions.

They were designed with great attention on details for a complete animal milk out, to promote good udder health and to make life easier for the farmer.

Dairy Electronic Pulsator Specification:

Model No.	HL-P06B
Model	LE30 milk pulsator
Type	electric milk pulsator
Voltage	24V
Outlet	2 plastic tubes
Pulsation Ratio	60:40
Pulsation Rate	adjustable
Packaging	Carton
Quantity	1PCS / Carton
Shipping	By Sea, By Train, By Air, By DHL / Fedex etc. (depends on quantity)

Dairy Electronic Pulsator Description:

Pulsator is one of the core components of milking system, which been used to control the milking times per minutes (pulsation rate) during milking process. Proper pulsation rate could help farmer complete animal milk out, get higher milk output, promote good udder health and to make life easier for the farmer. And the pulsation rate is adjustable, which could fit different parlour vacuum conditions. 2 types pulsator been provided: pneumatic pulsator and electric pulsator. The pneumatic pulsator is more popular using in small scale farms and individual farms, as for the medium and large scale farms, people like to choose the electric pulsator.

Dairy Electronic Pulsator Features:

- Electronic pulsators, the voltage is 24 V, and need utilize one electric pulsator controller and transformer, but they are more preciser and easy to maintain.
- The pulsator could be with 2 outlets (port connector) or 4 outlets (port connector), and the outlet tube material could be plastic or stainless steel.
- The pulsator pulsation ratio is 60:40, and the pulsation rate is adjustable according to the vacuum degree.
- Compared with pneumatic pulsators, the electronic pulsators are more accurate and durable, and easier to maintain.
