

Milking Machine System Interpulse Electronic Milking Pulsator LE20 with 2 Plastic Outlet

Our Product Introduction

for more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: CHUANG PU
- Certification: ISO, CE
- Model Number: HL-P06A
- Minimum Order Quantity: One piece
- Price: Negotiation
- Packaging Details: Carton
- Delivery Time: 5 - 8 working days
- Payment Terms: T/T, Western Union, Paypal
- Supply Ability: 1000 pieces/Month

Product Specification

- Name: Interpulse Electronic Pulsator
- Model: LE20
- Type: Electronic, Interpulse
- Material: Thermal Plastic
- Port: 2 Outlets
- Voltage: 24V
- Highlight: vacuum pulsator, milker pulsator

Product Description

Milking Machine System Interpulse Electronic Pulsator LE20 with 2 Plastic Outlet

Milking Machine System Interpulse Electronic Pulsator Quick Details:

- Item: Interpulse Electronic Pulsator
- Model: Interpulse pulsator
- Type: electric pulsator
- Pulsation Ratio: 60:40
- Outlet: 2 outlets or 4 outlets for choosing
- Type of Animal: Cow, sheep, goat.

Milking Machine System Interpulse Electronic Pulsator Deacription:

Pulsator is one of the core components of milking system, which been used to control the milking times per minutes (pulsation rate) during milking process. Proper pulsation rate could help farmer complete animal milk out, get higher milk output, promote good udder health and to make life easier for the farmer. And the pulsation rate is adjustable, which could fit different parlour vacuum conditions. 2 types pulsator been provided: pneumatic pulsator and electric pulsator. The pneumatic pulsator is more popular using in small scale farms and individual farms, as for the medium and large scale farms, people like to choose the electric pulsator.

Specifications

- 1) have got CE Certificate;
- 2) high efficiency;
- 3) attractive design;

- 1) have got CE Certificate;
- 2) high efficiency;
- 3) attractive design;
- 4) 2 types available Higher stability, Better performance ;
- 5)Electric pulsator Beautiful shape reasonable price won the highest praise .

Milking Machine System Interpulse Electronic Pulsator Features:

- Electronic pulsators, the voltage is 24 V, and need utilize one electric pulsator controller and transformer, but they are more preciser and easy to maintain.
- The pulsator could be with 2 outlets (port connector) or 4 outlets (port connector), and the outlet tube material could be plastic or stainless steel.
- The pulsator pulsation ratio is 60:40, and the pulsation rate is adjustable according to the vacuum degree.
- Compared with pneumatic pulsators, the electronic pulsators are more accurate and durable, and easier to maintain.

Milking Machine System Interpulse Electronic Pulsator Application:

As one of core components of milking system, pulsator been used to control the milking times per minutes (pulsation rate) during milking process so that farmers could complete animal milk out, get higher milk output, keep good udder health and to make life easier. According to different individual farms, different scale farms, we supply different models pulsator.

Milking Machine System Interpulse Electronic Pulsator Specification:

| | |
|-----------------|---|
| Model No. | HL-P06A |
| Model | LE20 milk pulsator |
| Type | electric milk pulsator |
| Voltage | 24V |
| Outlet | 2 plastic tubes / 4 plastic tubes |
| Pulsation Ratio | 60:40 |
| Pulsation Rate | adjustable |
| Packaging | Carton |
| Quantity | 1PCS / Carton |
| Shipping | By Sea, By Train, By Air, By DHL / Fedex etc. (depends on quantity) |

We produce different pneumatic milk pulsator, like L02, L80, L90, LT80

| | |
|-----------------|--|
| Model Item | Milk Pulsator |
| Model | L02, L80, L90, LT80 |
| Type | Pneumatic, Interpulse |
| Outlet | 2 or 4 |
| Pulsation Rate | 60 times / min |
| Pulsation Ratio | 60:40 |
| Milking System | milking machine for cows, goats, sheep, buffalo, camel |
