Durable Cow OB Apparatus Leg Catch Set (2 OB Handle) Cattle Delivery Instruments

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu China(Mainland)
- Brand Name: CHUANGPU
- Certification: ISO
- Model Number: HL-Q10A-1
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: CARTON
- Delivery Time: 7-10 working days
- Payment Terms: Western Union, MoneyGram, T/T
- Supply Ability: 5000PCS /Month

Product Specification

- Material: Carbon Steel Hook
- Application: Aids In The Delivery Of The Fetus When Assistance Is Required During Birth
- Farm Animals Type: Cow
- Hook Material: Carbon Steel
- Feature: Anti-Slip Leather Case
- Highlight: **cattle hoof trimming discs**, **cattle nose ring**

Product Description:

The Obstetric Chain Set is a crucial tool designed specifically for obstetrics and gynecology procedures. This medical equipment plays a vital role in assisting healthcare professionals during various obstetric procedures, ensuring safe and efficient delivery of newborns.
Constructed from high-quality stainless steel, the Obstetric Chain Set is durable and reliable, making it an essential tool in labor and delivery rooms. Its robust material ensures that it can withstand the rigors of obstetric procedures while maintaining sterility and hygiene standards.
The Obstetric Chain Set is commonly referred to as the Labor and Delivery Chain or Reproductive Health Chain due to its primary application in labor and delivery settings. It is an indispensable tool for obstetricians and gynecologists, providing support during childbirth and other reproductive health procedures.
Healthcare professionals rely on the Obstetric Chain Set to assist in various obstetric procedures, such as aiding in the delivery of the baby's head during vaginal birth or facilitating the removal of the placenta. Its ergonomic design and durable construction make it easy to handle and maneuver, ensuring precise and safe assistance during critical moments.
With its specialized function in obstetrics and gynecology, the Obstetric Chain Set is a must-have tool in any healthcare facility that offers maternal and reproductive health services. Its versatility and effectiveness in assisting healthcare providers make it an indispensable component of obstetric care.
Whether used in emergency situations or routine obstetric procedures, the Obstetric Chain Set is designed to meet the demanding requirements of labor and delivery scenarios. Its stainless steel construction ensures easy sterilization and maintenance, making it a hygienic and reliable tool for healthcare settings.
Overall, the Obstetric Chain Set is a valuable asset for healthcare providers in obstetrics and gynecology, offering essential support during labor and delivery procedures. Its durable material, specialized function, and ergonomic design make it an indispensable tool in ensuring safe and effective reproductive health care.

Features:

- Efficient and safe assistance during animal birth with this hook. Essential tool for safe and successful animal deliveries.
- Suitable for use with cows, goats, and other cattle on dairy farms. Designed for professional use in veterinary and animal husbandry settings.
- Matched with OB chain for using, aids in the delivery of the fetus when assistance is required during birth. This 1.5M length provides ample space for easy maneuverability and efficient delivery.
- Made of high-quality carbon steel for maximum durability and long-lasting use. Suitable for use in both indoor and outdoor environments. Lightweight and portable, making it easy to transport and store.
- Easy to clean and sanitize for maximum hygiene and safety. Compatible with a wide range of delivery instruments and accessories. Guaranteed satisfaction and value for money

Applications:

The Chuangpu HL-Q10A Obstetric Chain is a versatile and essential tool used in various reproductive health scenarios. This product, originating from China, consists of 2 handle puller hooks and a durable 1.5m silver chain.
One of the primary product application occasions for the Obstetric Chain is during labor and delivery in obstetric settings. It is commonly used by healthcare professionals to aid in the delivery of the fetus when assistance is required during birth. The chain provides a secure grip and allows for controlled manipulation during the birthing process.
Additionally, the Chuangpu HL-Q10A Obstetric Chain is also utilized in prenatal care scenarios. Obstetricians and midwives may use the chain to assist with certain procedures or to facilitate the positioning of the baby in the womb. The chain's design and length make it suitable for various prenatal applications, ensuring the safety and well-being of both the mother and the baby.
Furthermore, the Obstetric Chain can be beneficial in postpartum care situations. It may be used to address specific concerns or complications that arise after childbirth, providing necessary support and assistance as needed. The chain's reliability and ease of use make it a valuable tool in postpartum care settings.
